Description

Strain: Original (Friend)
Classification: Nidovirales, Coronaviridae, Coronavirus,Group 2
Common Name: Murine hepatitis virus
Original Source:
Isolated in hybrid (C58 X Bagg albino) mice inoculated with line I leukemia from C58 mice (MacDowell)
Depositor: C Friend

Batch-Specific Information

Refer to the Certificate of Analysis for batch-specific test results.

Propagation

Propagation Host:
8 to 10 gram mouse, i.p. inoculation
Recommended Host: M (8-10 gm, i.p.).
Host Range: sM (PR 1).
Host Range: sM (PR 1).
suckling mouse

Effect on Host:
Yes, in vivo effects: Death, liver necrosis
Death, liver necrosis.

Growth Conditions
Incubation: 3-5 days

Comments

Adult Swiss mice show signs of the disease but usually recover. Stored material should be passed 1-2 times before being used for large-scale experiments.

Biosafety Level: 2

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

ATCC Warranty

The viability of ATCC® products is warranted for 30 days from the date of shipment, and is valid only if the product is stored and cultured according to the information included on this product information sheet. ATCC lists the media formulation that has been found to be effective for this strain. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this strain. If an alternative medium
