Description

Designation: HH

Propagation

Medium

ATCC® Medium 2815: Heliorestis Medium

Growth Conditions

Temperature: 30°C

Atmosphere: Anaerobic, under light

Propagation Procedure

1. Put 6 to 8 mL of ATCC® Medium #2815 into a 13 x 100 mm screw cap test tube (small). Add 3% cysteine (stock concentration, 0.1 mL per each 5 to 6 mL of medium), 0.1 mL 1 M acetate and then fill the test tube to capacity with additional Medium #2815. Seal the test tube with a screw cap.
2. Let the tube sit at room temperature for a minimum of 30 minutes before inoculating.
3. Let the vial thaw at room temperature under anaerobic conditions.
4. Add the entire contents of the vial to the primary test tube and close tightly. (The test tube should be filled to capacity). One drop of the inoculated broth may be placed on non-selective media and incubated at 37°C to check for contamination.
5. Incubate the culture at 30°C under a tungsten lamp.
6. Once growth has been established (five to seven days), the culture should be transferred to fresh broth. If a large inoculum is used (10 - 20%) the medium does not need to be pre-reduced.

Notes

Additional information on this culture is available on the ATCC® web site at www.atcc.org.

References and other information relating to this product are available online at www.atcc.org.

Biosafety Level: 1

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

ATCC Warranty

The viability of ATCC® products is warranted for 30 days from the date of shipment, and is valid only if the product is stored and cultured according to the information included on this product information sheet. ATCC lists the media formulation that has been found to be effective for this strain. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this strain. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

Disclaimers

This product is intended for laboratory research purposes only. It is not intended for use in humans.

While ATCC uses reasonable efforts to include accurate and up-to-date information on this product sheet, ATCC makes no warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. ATCC does not warrant that such information has been confirmed to be accurate.

This product is sent with the condition that you are responsible for its safe storage, handling, and use. ATCC is not liable for any damages or injuries arising from receipt and/or use of this product. While reasonable effort is made to insure authenticity and reliability of strains on deposit, ATCC is not liable for damages arising from the misidentification or misrepresentation of cultures.

Please see the enclosed Material Transfer Agreement (MTA) for further details regarding the use of this product. The MTA is also available on our Web site at www.atcc.org
