

## **Antibiotic Susceptibility of *Staphylococcus aureus* subsp. *aureus* ATCC® BAA-39™**

Antimicrobial	Interpretation <sup>b</sup>	Antimicrobial	Interpretation
Amoxicillin	NT <sup>c</sup>	Gentamicin	R
Cefaclor	R	Imipenem	NT <sup>c</sup>
Cefamandole	R	Methicillin	R
Cefuroxime	R	Oxacillin	R
Cephalexin	NT <sup>c</sup>	Penicillin	R
Clindamycin	R	Tetracycline	R
Erythromycin	R	Tobramycin	NT <sup>c</sup>

Antibiotic susceptibility was obtained using a Kirby-Bauer disks.

<sup>b</sup> Parameter set: MIC Interpretation Guideline: CLSI M100ED33 (2023)

Therapeutic Interpretation Guideline: Natural Resistance

<sup>c</sup> Not tested due to lack of breakpoints for these reagents for this organism.
