

**ATCC medium: 210 Modified Starkey's medium C (ATCC medium 207) with 2.5% NaCl**

Add 25.0 g of NaCl to ATCC medium 207 (see below).

*ATCC medium 207:*

*Basal medium:*

KH <sub>2</sub> PO <sub>4</sub> .....	0.5 g
NH <sub>4</sub> Cl .....	1.0 g
Na <sub>2</sub> SO <sub>4</sub> .....	1.0 g
CaCl <sub>2</sub> . 2H <sub>2</sub> O .....	0.1 g
MgSO <sub>4</sub> . 7H <sub>2</sub> O .....	2.0 g
Sodium lactate.....	3.5 g
Yeast extract.....	1.0 g
Tap water.....	1.0 L

Adjust pH to 7.6 +/- 0.2. Autoclave 15 minutes at 15 lbs. Cool. Filter off precipitate. Readjust pH to 7.4. Resterilize 20 minutes at 10 lbs.

Separately prepare: sterile 2 N NaOH, filter-sterilized 7.5% L-cysteine . HCl, and filter-sterilized 1.0% ferrous ammonium sulfate.

Add the above solutions aseptically to 100 ml of the basal medium, just prior to use, in the following proportions:

L-cysteine solution.....	1.0 ml
Ferrous ammonium sulfate.....	5.0 ml

Adjust pH with sterile NaOH solution to 7.5 +/- 0.3.
