

***Bdellovibrio* sp.**

27047™

Description

Strain designation: ICPB 3326 [Bd. W]

Deposited As: *Bdellovibrio* sp.

Type strain: No

Storage Conditions

Product format: Freeze-dried

Storage conditions: 2°C to 8°C

Intended Use

This product is intended for laboratory research use only. It is not intended for any animal or human therapeutic use, any human or animal consumption, or any diagnostic use.

BSL 1

ATCC determines the biosafety level of a material based on our risk assessment as guided by the current edition of *Biosafety in Microbiological and Biomedical Laboratories (BMBL)*, U.S. Department of Health and Human Services. It is your responsibility to understand the hazards associated with the material per your organization's policies and procedures as well as any other applicable regulations as enforced by your local or national agencies.

ATCC highly recommends that appropriate personal protective equipment is always used when handling vials. For cultures that require storage in liquid nitrogen, it is

***Bdellovibrio* sp.**

27047

important to note that some vials may leak when submersed in liquid nitrogen and will slowly fill with liquid nitrogen. Upon thawing, the conversion of the liquid nitrogen back to its gas phase may result in the vial exploding or blowing off its cap with dangerous force creating flying debris. Unless necessary, ATCC recommends that these cultures be stored in the vapor phase of liquid nitrogen rather than submersed in liquid nitrogen.

Certificate of Analysis

For batch-specific test results, refer to the applicable certificate of analysis that can be found at www.atcc.org.

Growth Conditions

Medium:

ATCC Medium 587: YPSC medium

ATCC Medium 0550: R 8 A H medium

Temperature: 30°C**Atmosphere:** Anaerobic

Handling Procedures

ATCC® 27047™ is a predator of ATCC® 27048™ *Rhodospirillum rubrum* and is host-dependent. Therefore, it is necessary to establish a growing culture of the host strain before opening the vial of the *Bdellovibrio*.

Growth of host ATCC® 27048™:

1. Fill 13 mm screw cap test tubes completely to the top with #550 broth and then add 0.02 mL of 3% cysteine.

***Bdellovibrio* sp.**

27047

2. Let the test tubes sit for at least one hour prior to opening.
3. Open vial according to enclosed instructions.
4. Using a single tube of #550 reduced broth (5 to 6 mL), withdraw approximately 0.5 to 1.0 mL with a Pasteur or mL pipette. Rehydrate the entire pellet.
5. Aseptically transfer this aliquot back into the broth tube. Mix well.
6. Use 0.5 mL of the suspension to inoculate a #550 secondary broth tube.
7. Incubate the tubes at 30°C for 3 to 7 days under a tungsten lamp. Ensure that the screw cap tops are sealed during the incubation period.

Propagation of *Bdellovibrio*:

1. Open a vial of ATCC® 27047™ according to enclosed instructions.
2. Rehydrate the entire pellet with 0.5 mL of #587 broth. Withdraw suspension into a sterile test-tube.
3. Add approximately 0.5 mL of the host strain.
4. Melt tubes containing 2.5 mL of 0.8% semi-solid agar, and place in a 45°C water bath.
5. Add 0.2 to 0.3 mL of the host/predator suspension to each melted tube and pour over the surface of pre-warmed #587 plates.
6. Incubate plates anaerobically at 30°C for at least 10 days. After this time, plaques may be visible. Observe daily until plaques or clearing are seen.
7. Scrape off overlay into a test-tube and centrifuge at low speed to sediment the agar and cellular debris. The *Bdellovibrio* cells should be in the supernatant. Check for tiny, rapidly moving cells under a wet mount.

Notes

This item will exhibit growth under aerobic conditions but growth is better under anaerobic conditions.

When further propagating the strain, use the tube of the host set aside for this purpose to obtain a more concentrated suspension of the host. It should be transferred and used as a 24 hour culture.

Additional information on this culture is available on the ATCC® web site at www.atcc.org.

Warranty

The product is provided 'AS IS' and the viability of ATCC® products is warranted for 30 days from the date of shipment, provided that the customer has stored and handled the product according to the information included on the product information sheet, website, and Certificate of Analysis. For living cultures, ATCC lists the media formulation and reagents that have been found to be effective for the product. While other unspecified media and reagents may also produce satisfactory results, a change in the ATCC and/or depositor-recommended protocols may affect the recovery, growth, and/or function of the product. If an alternative medium formulation or reagent is used, the ATCC warranty for viability is no longer valid. Except as expressly set forth herein, no other warranties of any kind are provided, express or implied, including, but not limited to, any implied warranties of merchantability, fitness for a particular purpose, manufacture according to cGMP standards, typicality, safety, accuracy, and/or noninfringement.

Disclaimers

This product is intended for laboratory research use only. It is not intended for any animal or human therapeutic use, any human or animal consumption, or any diagnostic use. Any proposed commercial use is prohibited without a license from

ATCC.

While ATCC uses reasonable efforts to include accurate and up-to-date information on this product sheet, ATCC makes no warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. ATCC does not warrant that such information has been confirmed to be accurate or complete and the customer bears the sole responsibility of confirming the accuracy and completeness of any such information.

This product is sent on the condition that the customer is responsible for and assumes all risk and responsibility in connection with the receipt, handling, storage, disposal, and use of the ATCC product including without limitation taking all appropriate safety and handling precautions to minimize health or environmental risk. As a condition of receiving the material, the customer agrees that any activity undertaken with the ATCC product and any progeny or modifications will be conducted in compliance with all applicable laws, regulations, and guidelines. This product is provided 'AS IS' with no representations or warranties whatsoever except as expressly set forth herein and in no event shall ATCC, its parents, subsidiaries, directors, officers, agents, employees, assigns, successors, and affiliates be liable for indirect, special, incidental, or consequential damages of any kind in connection with or arising out of the customer's use of the product. While reasonable effort is made to ensure authenticity and reliability of materials on deposit, ATCC is not liable for damages arising from the misidentification or misrepresentation of such materials.

Please see the material transfer agreement (MTA) for further details regarding the use of this product. The MTA is available at www.atcc.org.
