

**ATCC medium: 573 *Bacillus* medium**

(NH <sub>4</sub> ) <sub>2</sub> SO <sub>4</sub> .....	1.3 g
KH <sub>2</sub> PO <sub>4</sub> .....	0.37 g
MgSO <sub>4</sub> . 7H <sub>2</sub> O .....	0.25 g
CaCl <sub>2</sub> . 2H <sub>2</sub> O .....	0.07 g
FeCl <sub>3</sub> .....	0.02 g
Glucose.....	1.0 g
Yeast extract.....	1.0 g
Distilled water.....	1.0 L

Adjust pH to 4.0 with 10 N H<sub>2</sub>SO<sub>4</sub>. For solid medium, make up above solution in double strength and adjust pH to 3.5. Make water agar at 40 g/L. Autoclave separately. Cool to about 50C and mix equal volumes of both solutions aseptically. This procedure avoids acid hydrolysis of the agar.
