

Product Sheet

Clostridium novyi (ATCC® 27606™)

Please read this **FIRST**

Intended Use

This product is intended for research use only. It is not intended for any animal or human therapeutic or diagnostic use.

Citation of Strain

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: *Clostridium novyi* (ATCC® 27606™)

Description

Designation: VPI 8099
Deposited Name: *Clostridium novyi* (Migula) Bergey et al.

Propagation

Medium

ATCC® Medium 1589: Modified chopped meat medium (ATCC medium 1490) with 1% glucose

Growth Conditions

Temperature: 37.0°C
Atmosphere: Anaerobic

Propagation Procedure

1. Open vial according to enclosed instructions.
2. Under anaerobic conditions, withdraw 0.5 ml of the recommended broth from a single test tube (5 to 6 ml) and rehydrate the entire vial contents.
5. Within 48 hours, growth should be evident by turbidity and gas in the broth. No growth should occur on agar plate incubated aerobically. After good growth has been established in broth, an agar plate may be streaked and incubated anaerobically to observe colonial morphology.

ANAEROBIC CONDITIONS:

Anaerobic conditions for transfer may be obtained by either of the following:

Use of an anaerobic gas chamber, or

Placement of test tubes under a gassing cannula system connected to anaerobic gas.

Anaerobic conditions for incubation may be obtained by any of the following:

Loose screw caps on test tubes in anaerobic chamber,

Loose screw caps on test tubes in an activated anaerobic gas pack jar, or

Use of sterile butyl rubber stoppers on test tubes so that an anaerobic gas headspace is retained.

Notes

Minimize exposure to oxygen, or strain will not remain viable. Thioglycollate medium does not support growth. Use only pre-reduced media that has been stored anaerobically.

Cells are large regular rods. Spores are formed subterminally. Colonies are irregular with a lobate margin.

Additional information on this culture is available on the ATCC® web site at www.atcc.org.

Biosafety Level: 2

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

ATCC Warranty

ATCC® products are warranted for 30 days from the date of shipment, and this warranty is valid only if the product is stored and handled according to the information included on this product information sheet. If the ATCC® product is a living cell or microorganism, ATCC lists the media formulation that has been found to be effective for this product. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this product. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

Disclaimers

This product is intended for laboratory research purposes only. It is not intended for use in humans. While ATCC uses reasonable efforts to include accurate and up-to-date information on this product sheet,
