

Product Sheet

AM6 [EC-AM6, pAM6] purified plasmid DNA (ATCC® 45020D™)

Hepatitis B virus

Please read this FIRST

Storage Temp.
Store unopened vial at 4°C or colder

Biosafety Level
2

Intended Use

This product is intended for research use only. It is not intended for any animal or human therapeutic or diagnostic use.

Citation of Strain

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: *Hepatitis B virus* (ATCC® 45020D™)

Description

Full length hepatitis B virus genomic DNA in pBR322 plasmid. Purified plasmid DNA (200 ng, dried).

Restriction digests of the clone give the following sizes (kb): BamHI--4.4, 1.85, 1.35; EcoRI--7.5; BgIII/PstI--5.2, 1.35, 0.96. AM6 is available as ATCC 39630, 40101, 45020 and 45020D.

- ATCC staff

The virus was isolated from plasma (subtype adw) from an HBsAg-positive donor. DNA was extracted from purified Dane particles.

- personal communication

AM6 is available at ATCC 39630, 40101 and 45020. The 1350 bp BamHI fragment encodes both group and subtype-specific determinants of HBsAg.

The complete viral genome was linearized with BamHI and inserted into pBR322.

- U.S. Pat. 4,942,125 dated July 17, 1990

A BamHI digest cuts the insert into fragments of 1.85 kb and 1.35 kb. The 1.35 kb fragment contains coding sequences for HBsAg and most of region P. The 1.85 kb fragment encodes HbcAg and most of the X gene product.

- U.S. Pat. 4,942,125 dated July 17, 1990

The 1350 bp BamHI fragment encodes both group and subtype-specific determinants of HBsAg.

- Proc. Natl. Acad. Sci. USA 78: 2606-2610, 1981

Designation: AM6 [EC-AM6, pAM6] purified plasmid DNA

Insert Information

Genome: hepatitis B virus

Gene name: genome, full-length

Strain: serotype adw

Type of DNA: genomic

Insert end: BamHI

Insert end: BamHI

Insert size (kb): 3.2

Vector Information

Construct size (kb): 7.5

Marker: ampR

Name of vector: pBR322

Intact vector size: 4.363

Type of vector: plasmid

Vector ends: BamHI

Host range: *Escherichia coli*

Vector cross reference: DNA Seq. Acc.: J01749

References

References and other information relating to this product are available online at www.atcc.org.

Biosafety Level: 2

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S.

Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

ATCC Warranty

The viability of ATCC® products is warranted for 30 days from the date of shipment, and is valid only if the product is stored and cultured according to the information included on this product information sheet. ATCC lists the media formulation that has been found to be effective for this strain. While other, unspecified media
