Description

Designation: FDA strain PCI 1001

Deposited Name: *Sarcina lutea* (Schroeter) Schroeter

Product Description: Formerly *Micrococcus luteus*. Deposited as *Sarcina lutea*. This organism is used for biological assays of a variety of antibiotics, susceptibility disc testing, and sterility testing.

Propagation

Medium

ATCC® Medium 18: Trypticase Soy Agar/Broth

Growth Conditions

Temperature: 30°C

Atmosphere: Aerobic

Propagation Procedure

1. Open vial according to enclosed instructions or visit www.atcc.org for instructions.
2. Rehydrate the entire pellet with approximately 0.5 mL of #18 broth. Aseptically transfer the entire contents to a 5-6 mL tube of #18 broth. Additional test tubes can be inoculated by transferring 0.5 mL of the primary broth tube to these secondary tubes.
3. Use several drops of the primary broth tube to inoculate a #18 plate and/or #18 agar slant.
4. Incubate at 30°C for 24-48 hours.

Notes

The strain is yellow-pigmented. If grown on Nutrient Agar (BD 213000) or Tryptic Soy Agar (BD 236950) with 5% defibrinated sheep blood, two colony types may be observed. These appear to be rough and smooth variants. This variation is less apparent on #18 plates.

The rough colonies are reported to be much more difficult to suspend in liquid for testing and have subtly different antibiotic susceptibilities than the smooth phenotype. Therefore, it is advisable to select smooth colonies when transferring this culture.

This strain is available as a certified reference material, ATCC® CRM-9341™.

Additional information on this culture is available on the ATCC® web site at www.atcc.org.

Biosafety Level: 1

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

ATCC Warranty

ATCC® products are warranted for 30 days from the date of shipment, and this warranty is valid only if the product is stored and handled according to the information included on this product information sheet. If the ATCC® product is a living cell or microorganism, ATCC lists the media formulation that has been found to be effective for this product. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this product. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

Disclaimers

This product is intended for laboratory research purposes only. It is not intended for use in humans. While ATCC uses reasonable efforts to include accurate and up-to-date information on this product sheet, ATCC makes no warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. ATCC does not warrant that such information has been confirmed to be accurate.
