Description

Strain Designation: 3147 [CBS 6431, CCY 29-3-106, CIP 48.72, DSM 1386, IFO 1594, NCPF 3179, NCYC 1363, NIH 3147, VTT C-85161]

Deposited Name: *Candida albicans* (Robin) Berkhout, anamorph

Antigenic Properties: Serotype A

Product Description:

Lyophilized yeast cells in a vial

Propagation

The information recommended in this section is to assist users in obtaining living culture(s) for their studies. The recommendation does not imply that the conditions or procedures provided below are optimum. Experienced researchers may initiate the growth of a culture in their own way.

ATCC® Medium 200: YM agar or YM broth

ATCC® Medium 28: Emmons' modification of Sabouraud's agar

ATCC® Medium 1245: YEPD

Growth Conditions

Temperature: 25°C

Atmosphere: Typical aerobic

Recommended Procedure

For freeze-dry (lyophilized) ampoules:

1. Open vial according to enclosed instructions.
2. From a single test tube of sterile distilled water (5 to 6 mL), withdraw approximately 0.5 to 1.0 mL with a sterile pipette and apply directly to the pellet to rehydrate it. Stir to form a suspension.
3. Aseptically transfer the rehydrated pellet (suspension) back into the test tube with the sterile distilled water. Mix well.
4. Let the test tube sit at room temperature (~23 °C) for at least 2 hours, if not overnight.
5. Mix the suspension well. Use several drops to inoculate a test tube or slant or a plate with recommended medium.
6. Incubate the test tube or plate at the temperature recommended.

Notes

Certificates of Analysis are available electronically at www.atcc.org, or by hardcopy upon request. Colonies are white to cream-colored, butyrous, with entire margins. Cells globose-ovoid-ellipsoid, reproducing by budding, usually also generating straight or branched chains of cells (sometimes elongate) ["pseudohyphae"]. On some media producing true septate hyphae and thick-walled globose-obovoid chlamydo spores.

Isolation

Man with bronchomycosis

effective for this product. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this product. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

Disclaimers

This product is intended for laboratory research purposes only. It is not intended for use in humans. While ATCC uses reasonable efforts to include accurate and up-to-date information on this product sheet, ATCC makes no warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. ATCC does not warrant that such information has been confirmed to be accurate.

This product is sent with the condition that you are responsible for its safe storage, handling, and use.
