# Encephalomyocarditis virus (ATCC® VR-1479™)

Please read this **FIRST**

Storage Temp.  
**-70°C or colder**

---

Biosafety Level  
**2**

## Intended Use

This product is intended for research use only. It is not intended for any animal or human therapeutic or diagnostic use.

## Citation of Strain

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: Encephalomyocarditis virus (ATCC® VR-1479™)

## Description

**Strain:** M-variant (TC passaged)

**Classification:** *Picornaviridae*, *Cardiovirus*

**Original Source:** ATCC® VR-1479™ was created by serially passaging ATCC® VR-1314™ two times onto NCTC clone 929 (L-929) cells, ATCC® CCL-1™. The original strain was isolated from the heart of mice inoculated by peripheral route with EMC of swine.

**Depositor:** ATCC

## Batch-Specific Information

Refer to the Certificate of Analysis for batch-specific test results.

## Propagation

**Propagation Host:**

NCTC Clone 929 (ATCC® CCL-1™)

**Effect on Host:**

Rounding and sloughing with general degeneration

**Medium:**

EMEM (ATCC® 30-2003) + 10% FBS (ATCC® 30-2020)

**Growth Conditions**

**Temperature:** 37°C

**Recommendations for Infection:** For best results, infection should be performed on a 75-80% confluent, 18-48 hour old cellular monolayer. Prepare dilution of virus in minimum amount of volume (e.g. 1 mL per 25 cm<sup>2</sup>), optimized for propagation (e.g. MOI 0.01-0.1 recommended). Wash monolayer two times with PBS or serum free medium prior to inoculation. Adsorb virus dilution for 1 hour at 37°C in a humidified 5% CO<sub>2</sub> atmosphere, rocking every 15-20 minutes to redistribute inoculum. End adsorption by adding virus growth medium.

**Incubation:** 4-10 days

## Comments

ATCC® VR-1479™ (M-variant) is a cell culture passaged lineage of the M-variant (ATCC® VR-1314™) reported to induce diabetes in selected strains of mice such as Balb/cBy and DBA/2 mice. Note that virus loses diabetagenic properties upon multiple passage in cell culture.

## References

References and other information relating to this product are available online at [www.atcc.org](http://www.atcc.org).

## Key Abbreviations

°C, degrees Celsius

CO<sub>2</sub>, carbon dioxide

EMEM, Eagle's Minimum Essential Medium

FBS, fetal bovine serum

PBS, phosphate buffered saline

MOI, multiplicity of infection

## Biosafety Level: 2

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

## ATCC Warranty

The viability of ATCC® products is warranted for 30 days from the date of shipment, and is valid only if the product is stored and cultured according to the information included on this product information sheet. ATCC

Product Sheet

# Encephalomyocarditis virus (ATCC® VR-1479™)

**Please read this FIRST**

**Intended Use**

This product is intended for research use only. It is not intended for any animal or human therapeutic or diagnostic use.

**Citation of Strain**

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: Encephalomyocarditis virus (ATCC® VR-1479™)

lists the media formulation that has been found to be effective for this strain. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this strain. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

**Disclaimers**

This product is intended for laboratory research purposes only. It is not intended for use in humans. While ATCC uses reasonable efforts to include accurate and up-to-date information on this product sheet, ATCC makes no warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. ATCC does not warrant that such information has been confirmed to be accurate.

This product is sent with the condition that you are responsible for its safe storage, handling, and use. ATCC is not liable for any damages or injuries arising from receipt and/or use of this product. While reasonable effort is made to insure authenticity and reliability of strains on deposit, ATCC is not liable for damages arising from the misidentification or misrepresentation of cultures.

Please see the enclosed Material Transfer Agreement (MTA) for further details regarding the use of this product. The MTA is also available on our Web site at [www.atcc.org](http://www.atcc.org)

Additional information on this culture is available on the ATCC web site at [www.atcc.org](http://www.atcc.org).
