

Product Sheet

# Human herpesvirus 5 (ATCC® VR-1788™)

Please read this **FIRST**

---

## Intended Use

This product is intended for research use only. It is not intended for any animal or human therapeutic or diagnostic use.

## Citation of Strain

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: Human herpesvirus 5 (ATCC® VR-1788™)

## Description

**Strain:** ATCC-2011-8

**Classification:** *Herpesviridae, Cytomegalovirus*

**Common Name:** Human cytomegalovirus

**Original Source:** Clinical patient positive for CMV, Virginia, July 2011

**Depositor:** ATCC®

## Batch-Specific Information

Refer to the Certificate of Analysis for batch-specific test results.

## Propagation

**Propagation Host:**

MRC-5 (ATCC® CCL-171™)

**Effect on Host:**

CPE, rounding and clustering

**Medium:**

EMEM (ATCC® 30-2003™) + 10% FBS (ATCC® 30-2020™)

**Growth Conditions**

**Temperature:** 37°C

**Recommendations for Infection:** This product is produced by co-cultivation of virus with fresh host cells. Prepare a bulk cell suspension the day of inoculation. Seed culture vessels at  $1.3\text{--}1.5 \times 10^4$  cells per  $\text{cm}^2$ .

Calculate the volume of virus needed to achieve an optimal MOI (e.g. 0.1) and then dilute virus in virus growth medium to prepare the virus inoculum. Add virus inoculum to culture vessels. Incubate for 24 hours at 37°C in a humidified 5%  $\text{CO}_2$  atmosphere. Aspirate virus growth medium to remove any traces of DMSO and then add fresh virus growth medium to cultures. Continue incubation.

**Incubation:** 14 days

## Comments

Cryopreserve virus in 7% DMSO (ATCC® 4-X™).

## References

References and other information relating to this product are available online at [www.atcc.org](http://www.atcc.org).

## Key Abbreviations

°C, degrees Celsius

$\text{CO}_2$  ( $\text{CO}_2$ ), carbon dioxide

CPE, cytopathic effects

EMEM, Eagle's Minimum Essential Medium

DMSO, dimethyl sulfoxide

FBS, fetal bovine serum

MOI, multiplicity of infection

## Biosafety Level: 2

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

## ATCC Warranty

The viability of ATCC® products is warranted for 30 days from the date of shipment, and is valid only if the product is stored and cultured according to the information included on this product information sheet. ATCC lists the media formulation that has been found to be effective for this strain. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC
